

# A Perfect Design With You in Mind!

This bright 6.5" color TFT LCD display can be customized to utilize any color combination that you desire.

An intuitive design allows you to display essential navigation information all on a single screen.

The "soft key" menu system allows you to easily access system features for whatever mode you are using.

No more hunt and peck with this familiar telephone keypad layout. It allows you to enter in your information with confidence and accuracy.

With this removable table top mount, you can install it high up on the fly bridge or flush mount it in your center console. And with its waterproof case, you never have to worry about the elements.

A special demo mode is available for your training purposes.

For those couch potatoes out there, you can now feel at home with the optional infrared remote that allows you to operate your GP1850D from a distance!

Special mode buttons allow you to switch between various displays with the touch of a single key.

Switching chart cards is right at your fingertips with this front loading mini chart card slot. You even have the choice of using Furuno or Navionics® charts.

For years we've heard your comments and suggestions about our products. Well, we've taken them to heart and created a new award winning product. Introducing the 1999 NMEA Best of Show Winner, the Furuno GP1650 and it's big brother the GP1850D series of GPS/DGPS/Chart Plotters/Fish Finders! These rugged units are a product of 50 years of expertise

and development of leading edge technology. Stop by your Furuno dealer today to get a glimpse of what we've designed for you!

Chart Plotter display showing depth contours, vessel's track, your planned route, waypoints, your current position and even buoy markers.

A high powered 600W RMS, 50kHz (wide beam) and 200kHz (narrow beam) sounder is available on fish finder versions. GP1850DF has 1kW RMS option.

The highway mode display is useful when you are heading for a specific site or following a planned route. Course, bearing, speed and range to your waypoints are easily visible to keep you on route.

The nav data display is perfect when you need to view important steering information from a distance. You can clearly read your vessels position, speed, course, range and bearing.

#### New Software Enhancements!

- New memory card allows you to save an unlimited number of waypoints and routes
- User selectable marks
- Adjustable chartplotter/fish finder screen
- Choice of pleasure cruising or fishing modes
- DGPS output for non-DGPS units
- Updated "soft key" menus.
