

WHATEVER THE CONDITIONS...

NOTHING CHALLENGES IT!

Pick A Chart, Any Chart!

Tired of playing the chart game? Searching for a combo unit that has all the features you want, plus the type of charts *you* want to use? Your search is over! Furuno is proud to announce the new C-Map® NT chart card versions of the extremely popular GP1650 and GP1850D series of high performance integrated navigation equipment. Now you get to choose from two units that support Navionics® & Furuno charts or C-Map® NT & Furuno charts.

New Software Enhancements

We didn't stop with chart options, there are several new software enhancements that make these products a must have!

- ▶ New memory card allows you to save an unlimited number of waypoints and routes
- ▶ 16 different user selectable marks
- ▶ Adjustable chartplotter/fish finder screen
- ▶ Choice of pleasure cruising or fishing modes
- ▶ DGPS output for non-DGPS units
- ▶ Updated "soft key" menus.

**1999 NMEA
Best of Show
GP1650DF**

Using Furuno's Interactive Navigation System, the GP1650 & GP1850D GPS/DGPS/Chart Plotter/Fish Finder series can "talk back" to most Furuno Radars, sending waypoint information and displaying it on the Radar screen.
