NAVnet

That's what the competition is saying about our new NavNet product line! Our goal is to give you the features you want and that's what we've done.

- You want radar and plotter images displayed either side-by-side or with chart overlay. No problem.
- You want to add GPS capabilities. Just add the GPS Receiver Antenna.
- You want a fish finder. Unlike competitive systems that require purchasing a dedicated fish finder, NavNet allows you to add the 600W/1kW Black Box Fish Finder and save thousands of dollars.
- You want it all in a single unit. Done.
- You want three displays that can control any of the features. Done.
- You want it in color. Done.
- You would rather have monochrome. Done.
- You want to use Navionics® charts. Done.
- You want to use C-MapNT charts. Done.
- You want to hook up an engine room camera to the display. Done.
- You want to know where to get NavNet. Visit your Authorized Furuno Dealer and you're done.
