

See it. Believe It!

**CH250
Searchlight
Sonar**

- Find fish targets all around the boat, while displaying a vertical slice simultaneously
- Ability to look forward or to the side of the boat for fish by using the tilt and train capability
- Vertical slice mode shows an expanded slice of fish school on selected bearing
- True electronic stabilization for rock steady operation in severe weather conditions
- 1,200W of power in either 60, 88 or 150kHz
- 10.4" Color LCD display or choose your own display with the Black Box version.

Success Starts with Furuno \$\$\$

When it comes to serious fisherman, one brand of fish finding equipment comes to mind, Furuno. Year after year, more sport fishing tournaments are won by teams who rely on Furuno to help them find the catch that will bring in the big prize.

The team of BLUE THUNDER, Ben Taylor (below), owner Phillip Arciero Jr., and Capt. Richard Hoffman walked away with a cool \$143,100 after winning the Los Cabos Tuna Jackpot. They used Furuno's new CH250 Sonar to find this prize catch.

The Bisbee's Black and Blue Marlin Tournament was won by Mike Cromer's AFTER MIDNIGHT team. The boat is equipped with Furuno's CH37 Sonar, the big brother to the CH250. They use it all the time to keep the boat positioned in the bait schools. Furuno's CH37 helped AFTER MIDNIGHT catch first place and \$989,910!
