## NEW Furuno FCV1100

The new FCV1100 is a high-performance, dual-frequency fish finder that features a state-of-the-art 10.4" color TFT LCD screen that presents a remarkably sharp and brilliant picture. The FCV1100 comes with an easily set 1kW, 2kW or 3kW transmitter. It also utilizes Furuno's Free Synthesizer (FFS), which means you can easily select from a broad range of frequencies including 28,38, 50, 88, 107 or 200 kHz. This makes the FCV1100 perfect for new installations and retrofits.

The FCV1100 offers a variety of display modes including LF, HF, both LF & HF, triple, bottom-lock, A-scope, mix, NavData and more. Contact your Furuno dealer for more information or visit our website.
