

Search above & below to find more fish.

Use radar to locate
birds feeding on
bait fish.

Find fish and view the
sea bed contour with
an echo sounder.

Pinpoint the position
of fish schools around
your boat using sonar.

Finding fish is as much an art as it is a science. With Furuno's fishing package on your boat, you have all the tools you need at your fingertips.

Furuno's high-powered scanning sonar rapidly detects and determines range, bearing & depth of the bait, thermocline or targeted fish species. The echo sounder shows the bottom structure, conditions and density in a historical or real-time presentation, while helping you locate fish. Finally, the high-power radar is used to locate flocks of seabirds that are searching or actively feeding on fish. They will lead you to where the fish are!

So if you are serious about finding fish, Furuno has an electronics package that will make you a master of the art of fishing!

Furuno's Winning Combination
CH250 Searchlight Sonar &
1953C NavNet Radar/Chart Plotter
with 1/2/3 kW Network Sounder.
