

"I noticed a boat on a collision course. I was able to avoid the other boat thanks to my Furuno Radar."

Dear Furuno:

I purchased a radar for my boat last year. Up until last Sunday, I did not realize the value of my radar. I was fishing offshore about 15 miles with my 12 year old son and his friends when the fog rolled in. It came at mid-day with no warning. I could see less than 50 feet and I had to rely on my radar for safety. Mid way on my return, I noticed a boat on a collision course. I was able to avoid the other boat thanks to the Furuno radar. Now I know why I purchased it. Strictly for safety. Thanks for making such a great and affordable product. It worked like a charm.

A believer and life long customer,

John Dabek

When it comes to quality marine electronics, one name stands above the rest. For more than 50 years, Furuno has developed electronics that more mariners trust. Ask your local Furuno dealer about the latest in Furuno gear, like our new NavPilot 500 Autopilot.
