

The Wait Is Over!

Introducing The Furuno Complete Helm Solution.

Having a helm that is aesthetically pleasing, as well as reliable, has been the wish of many boat owners for years. Now you can have the best of both worlds with a complete Furuno helm. Get the same rugged and reliable equipment that the USCG is using on their vessels, plus a few new products to round out the package. Put our award winning products to work for you today!

FM3000 VHF/DSC Radio

This waterproof & easy to operate unit features a backlit LCD display with large function keys. You are sure to feel safe knowing that the FM3000 has built-in Digital Selective Calling (DSC) with an independent distress switch that can transmit a formatted distress alert with your position & time.

new!

RD30 Digital Depth & Temp

Utilizing Furuno's 235kHz Smart Sensor, the RD30 gives you accurate depth readings in water as shallow as 2 feet and temperature changes as minor as 0.02 of a degree. When other NMEA sensors are connected, it will act as a navigational repeater & allow you to create custom info displays.

NavPilot™ Autopilot

Steering your boat straight the first time and every time, the NavPilot™ 500 is a revolutionary autopilot that learns more about your boat on each voyage. It is loaded with features not found on other autopilots, such as the unique FishHunter™ mode which allows you to navigate to fishing targets.

new!

GP37 DGPS/WAAS Nav

Compact in size, yet loaded with features and performance, Furuno's GP37 is perfect for any size vessel. This hybrid DGPS/WAAS navigator displays vital navigation data on a 4.5" Silver Bright LCD. That is why the USCG has selected the GP37 as their primary navigation receiver.

NavNet® Radar/Plotter

You can use any NavNet unit as a full function, single display system or connect multiple displays using a high speed Ethernet network. Choose from two units that accept either Navionics® or C-Map/NT cartography. You can also add other components such as a fish finder or GPS/WAAS receivers.

FM3010 Remote Mic

This optional second station remote mic is a perfect complement to the FM3000 VHF radio. By adding the FM3010, all available functions of the FM3000 (except DSC operation) can be controlled from remote locations, such as the fly-bridge or deck.
