Introducing the new FAR21x7 and FAR28x7 Radar Series

Furuno's Deep Sea Radars are some of our best selling radars in the commercial market. Simply walk down any dock, in any harbor and you will see the Furuno antennas proudly spinning. Why are they so popular? Because Furuno packages over 50 years of experience, reliability and flexibility into every single unit. When you have Furuno on your vessel, you can feel confident that you will reach your destination no matter what mother nature dishes out. And in true Furuno style, we also offer these Radars as Non-IMO Black Box units. This means you can supply any SXGA monitor you want or use one of our new sunlight-viewable marine monitors. So whether you are using Radar for collision avoidance, navigation or monitoring flocks of birds for fishing, choosing Furuno is the easiest step.
