

Introducing The Furuno Complete Helm Solution.

GP37 DGPS/WAAS Nav

Compact in size, yet loaded with features and performance, Furuno's GP37 is perfect for any size vessel. That is why the USCG has selected the GP37 as their primary navigation receiver.

FM3000 VHF/DSC Radio

This waterproof & easy to operate unit features a backlit LCD display with large function keys. The FM3000 has built-in Digital Selective Calling (DSC) with an independent distress switch that can transmit a formatted distress alert with your position & time.

new!

MU155C 15" Color LCD

The MU155C features a wide range of interface capabilities that will accommodate all of your marine display needs. This ultra-bright 15" monitor has a fully positionable Picture-In-Picture (PIP) and will accept virtually any video signal.

new!

LH3000 Loud Hailer

This high-performance 30 watt loud hailer is designed to provide high quality onboard and ship-to-ship communications under almost all circumstances by using voice or one of eight internationally acknowledged warning signals from the horns.

new!

NavPilot® Autopilot

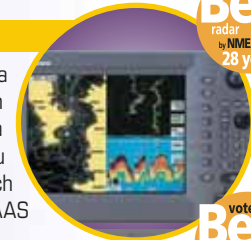

Steering your boat straight the first time and every time, the NavPilot 500 is a revolutionary autopilot that learns more about your boat on each voyage. It is loaded with features not found on any other autopilot.

new!

NavNet® Radar/Plotter

You can use any NavNet unit as a full function, single display system or connect multiple displays using a high speed Ethernet network. You can also add other components such as a fish finder or GPS/WAAS receivers.
