

**Awarded "Best Navigation" three years in a row,  
what more can we say?**

**NAVnet  
3D**

NavNet 3D is a multi-function display that performs a variety of tasks. Use it as a chart plotter, track AIS targets, display depth & wind data or navigate with its dual range Radar. You name it, NavNet 3D can do it!

Now view C-MAP by Jeppesen charts in stunning 3D or traditional 2D. Overlay high resolution satellite photos to further enhance the chart data being displayed.

NavNet 3D was awarded "Best Navigation" by the National Marine Electronics Associate (NMEA) in 2008, 2009 & 2010.

### GPS Navigators & Instrumentation

All of our professionally designed GPS Navigators and instruments are designed to meet the needs of sail boaters. The GP33 & RD33 utilize NMEA2000 or NMEA0183 to communicate with other units. Single-wire connectivity and full compatibility with other navigation equipment facilitates easy, plug-and-play installation. Whether you use these instruments by themselves or part of your new NavNet 3D network, this addition will be both useful and enhance the beauty of your helm.

Sailing Instrument packages also available.
