## **FURUNO'S FCV1100 10.4-INCH COLOR LCD SOUNDER OFFERS PROFESSIONAL QUALITY PERFORMANCE**

Furuno's advanced FCV1100 Color Video Sounder has been specially built to make installation a little bit easier. This is achieved with the Furuno Free Synthesizer (FFS) Transceiver, which allows you to choose a variety of frequencies and output power to suit your current transducer situation. So whether you already have a transducer installed or you are planning to install a new one, the FCV1100 offers a solution for every scenario.

The FCV1100 is a high-performance, dual frequency sounder, select from 28, 38, 50, 88, 107 or 200 kHz. With the FFS Transceiver, you may select a different frequency and output power to suit a special transducer configuration.

Featuring a high-resolution 10.4-inch Color TFT LCD display, the FCV1100 offers unsurpassed visibility. The unit can display echoes in 8 or 16 colors as standard settings, or use the custom color menu to blend colors giving you the ability to display more than 4,000 colors. Use the variety of colors to represent different levels of sensitivity, allowing you to easily identify target size and school density. In addition, the background color can be changed for optimum day or night viewing.

Furuno's FCV1100 is a high powered 1, 2 or 3 kW dual frequency echo sounder. With this high power output, the FCV1100 provides 8 range scales that may be custom preset anywhere from 16 to 6,000 feet. You can also set the range shift from 0 to 6,000 feet, with the maximum scale of 12,000 feet. As with many of Furuno's echo sounders, it offers many versatile display modes including single or dual display modes, marker zoom, bottom-lock with expansion and bottom discrimination, Nav Data, A-Scope and low frequency- high-frequency mix picture. You also have the ability to customize the screen layout, with a choice of single, double or triple pictures on a horizontally or vertically split screen. There are two customizable user modes that allow you to program the display modes that you use most frequently.

For more information on the new Furuno FCV1100 of Color Echo Sounders or any product in Furuno's full line of marine electronics, contact: Furuno U.S.A., 4400 N.W. Pacific Rim Blvd., Dept. P, Camas, WA 98607. Phone: (360) 834-9300. Fax: (360) 834-9400.
