## **FURUNO OFFERS PERSONALIZED WEB PAGE FOR NAVNET 3D OWNERS**

**Camas, WA** — Furuno's award winning NavNet 3D multi-function units have taken the industry by storm, so what's the next step? According to Furuno, the next step is to ensure that your unit is up-to-date with the latest software. "We are continually adding new features and enhancing current software to get the most out of NavNet 3D," said Eric Kunz, Furuno USA Senior Product Manager. "Much like your computer, it's important to stay up-to-date with the latest version to make sure you have the newest fixes and features on your system," added Kunz.

To facilitate getting you the latest software, Furuno has implemented a My NavNet section on their web site [www.navnet.com](http://www.navnet.com). Here you will be able to register your NavNet 3D products, download the latest software updates, purchase chart data and receive news on NavNet 3D products. Once you open the web site, you can click on the My NavNet logo at the bottom right corner and you will be brought to an area where you can create a new account or log into your account. After you have logged in, you will be able to view your boat information that you entered, along with your registered products. If you need to register new products, you can easily do that by clicking "Add NavNet."

When breaking news is available, that will be displayed at the very top of the page under the News section. To see what the latest version of NavNet 3D software is being offered, simply click on xxxxxx. Here you will be able to view the new features and bug fixes that are contained within the latest software release. You can also download a PDF document containing instructions on how to update the software on your NavNet 3D.

"Our goal is to continue to develop software for NavNet 3D and make it easily accessible to our customers," said Kunz. If updating your own unit is a daunting task, you can also contact your local, authorized Furuno dealer to update the software for you. There may be a fee associated with it, but if it offers you peace of mind, it's worth every dime.

For more info on [www.NavNet.com](http://www.NavNet.com) or NavNet 3D, contact: Furuno U.S.A., 4400 N.W. Pacific Rim Blvd., Camas, WA 98607. (360) 834-9300. [www.FurunoUSA.com](http://www.FurunoUSA.com)
