

New NavNet vx2 Software Version 3.02

June 5, 2008

Service Advisory #09-08T

Effective 5/29/08, All NavNet vx2 processor units will ship with version 03.02 software. Some of the changes include:

- Corrected Marine Zone Forecast. Sirius displays/C-MAP only.
- Corrected Nowrad display. Sirius displays/C-MAP only.
- Updated Marine Zones. Sirius displays/C-MAP only
- Adding External Buzzer menu to Black Box processor units.
- The ability to display vessel name when AIS Class B message 24 is received.
- Adding a checksum to HDT sentence output from DATA2 port. (for AIS connection)
- Connectivity to upcoming GP330B/WS200 sensors added.

The following table lists the current software for NavNet vx2

Model		Current Program	Previous Version
1824C/1934C/1944C/	Navionics	1950023-03.02	1950023-03.01
1954C/1964C/GP1920C	C-MAP	1950024-03.02	1950024-03.01
1824CBB/1934CBB/1944CBB/	Navionics	1950025-03.02	1950025-03.01
1954CBB/1964CBB/GP1920CBB	C-MAP	1950026-03.02	1950026-03.01
1724C/1734C/GP1720C	Navionics	1950027-03.02	1950027-03.01
	C-MAP	1950028-03.02	1950028-03.01

Current software and instructions can be downloaded from www.FurunoUSA.com, or you can order part # SD1-VX2-SOF which contains both C-MAP and Navionics software preloaded on an SD card.

Warranty Information: Furuno will not be offering any warranty allowances for this software upgrade, unless the circumstances are deemed "critical", which is at the sole discretion of Furuno. Dealers wishing to offer this upgrade as a service to their customers are authorized to charge whatever upgrade fee they deem reasonable for associated labor and materials. Furuno is pleased to offer complimentary software upgrades to anyone choosing to send their unit (prepaid) to Furuno for updating.

If you have any questions, you may visit our website (www.FurunoUSA.com) and click on "Support," then "Ask Furuno a Question." You may also contact a Furuno support technician at either our Camas, WA facility, (360) 834-9300 or at our Denton, MD facility, (410) 479-4420.
