**New Cloud Solutions
by My TimeZero**

1. TimeZero™ Products under My TimeZero™

NavNet TZtouch and TZtouch2 MFDs utilize internet connectivity for weather downloads, chart unlocking, etc. **These MFDs additionally offer a variety of new solutions via cloud: saving points, routes, tracks, and settings.**

New cloud solutions are currently available for TimeZero™ products including **NavNet TZtouch (TZT9/14/BB and NavNet TZtouch2 (TZTL12F/15F).** More updates and improvements are planned to network with **MaxSea/Nobeltec TIMEZERO™ PC software** and **iPad App** under **My TimeZero™**, where you will have a variety of unique features by registering your ID and connecting them to the Internet. This document describes how you can utilize the Cloud solution by My TimeZero™ with the NavNet TZtouch and TZtouch2 MFDs.

The following table shows available functions per MFD versions.

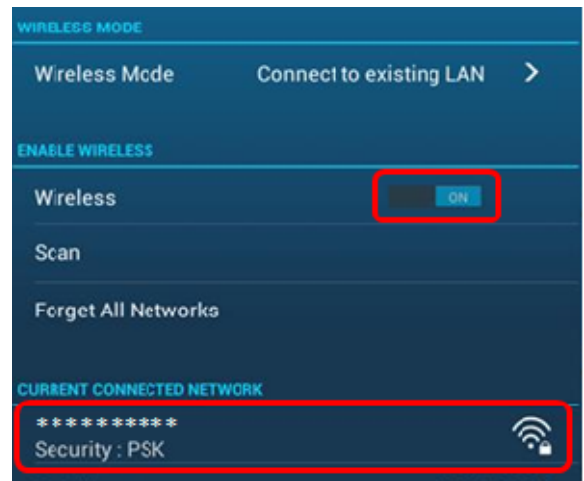

No	Functions	TZT9/14/BB	TZTL12F/15F
1	Save points and routes	V5.01 and later	V6.01 and later
2	Save settings	V5.01 and later	V3.01 and later

2. Creating and Logging into My TimeZero™ Account

In order to utilize the Cloud features, you must create a My TimeZero™ account and log into the TIMEZERO™.

The account creation and login procedures are described within the TZTL12F/15F screenshots below.

(1) Connect the TZTL12F/15F to the Internet.

(2) In [Settings] – [General], you can see [SOCIAL NETWORK] option:
Tap [Login].

A Web browser will open. You can create your My TimeZero™ account or login from this page.

Log In

Don't have a My TIMEZERO account yet? [Create an account](#)

Email

Password

Remember me [Forgot password?](#)

– Or –

If you do not have a My TimeZero™ account...

Access [[Create an account](#)] and create your account.

If you have a My TimeZero™ account...

Option 1

Enter your e-mail and password and select [Log In].

Option 2

If you have a Facebook account, this option can be utilized. If you just login with your Facebook account on this page, you can join My TimeZero™ and immediately have access to unique Cloud features.

After logging into your My TimeZero™ account, the screen will show a message bar and the [SOCIAL NETWORK] menu will show your user name.

Now, you are ready to utilize the Cloud features.

Note:

The login information will be shared between the MFDs in the network.

3. Linking My TimeZero™ Products with Users

After logging into My TimeZero™, you can enjoy the unique features below.

3.1. Saving Points, Routes, and Tracks

When TimeZero™ products are logged into My TimeZero, points, routes, and tracks can be saved to the Cloud.

To back up data to the Cloud, access [Settings] – [Files] and select [**Backup Data in the Cloud**].

To restore the data from the Cloud, select [**Restore Data from the Cloud**].

Tips:

Two (2) options are available to restore the data, selectable in [**Restore Mode**].

[Merge] If new points, routes, and tracks have been entered since the last backup in the Cloud, the data in the Cloud is simply added to the current database.

[Replace] The database is replaced with the data in the Cloud. New points, routes, and tracks that have been entered since the last backup to the cloud will disappear.

Case 1 – Save points and routes and restore them

In this example, one unit is logged into My TimeZero. You can upload and download points, routes, and tracks to to and from the cloud.

Case 2 – Share points and routes with others

In this example, multiple units or multiple models are logged into the same My TimeZero account. While saving points, routes, and tracks from one unit to the Cloud, the data can be downloaded to the other unit.

When MFDs on multiple boats are logged into the same account, each boat can utilize the same data saved to the Cloud.

3.2. Saving Settings

In addition to the function to save and restore your settings to external USB memory, the TimeZero™ products can save and restore it via the Cloud.

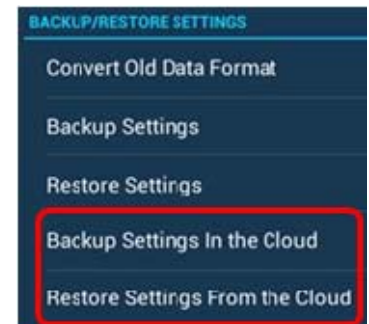

Here is the backup and restore flow described within the following TZTL12F/15F screenshots.

- (1) Access [Settings] – [Files] – [BACKUP/RESTORE SETTINGS].
- (2) Tap [**Backup Settings In the Cloud**] to save the settings to the Cloud.
- (3) Tap [**Restore Settings From the Cloud**] to restore the saved settings through the Cloud.

Note:

The setting data contains sensor data such as data sources. When the sensor configuration is changed after saving the settings to the Cloud, the sensor setup may not be restored properly.
