## Controls

### Key control

**TZT9/TZT14****Home key**

- Opens the display selection window.
- Displays the menu icon bar.

**For TZTBB:**

Displayed on the screen as an icon.

**Menu icon bar****Display selection window****TZTBB (Switch box)****Power key**

- Turns the power on.
- Adjusts the brilliance of the display.

**For TZTBB:**

- Adjusts the brilliance of the power indicator.
- Turns the power off. (Device or Network)

**RotoKey™**

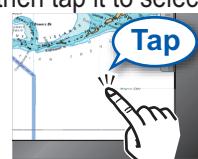

- Push:**  
Opens the RotoKey menu or validates the selected item.

**Rotate:**

- Selects an item on the RotoKey menu.
- Selects the range scale on the chart plotter or the radar screen.

**For TZTBB:**

Tap the screen to display the RotoKey menu. If the menu you are looking for is not shown, select [More...] (then drag the menu items) then tap it to select.

**FURUNO ELECTRIC CO., LTD.**

## Touch control

### Tap with finger

- Select a menu item.
- Select an object to display the corresponding pop-up menu.

### Drag with finger

- Pan the charts.
- Scroll the menu.

### Pinch with two fingers

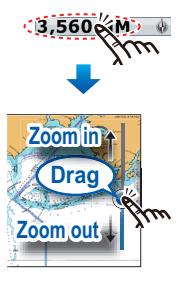

Zoom in

Zoom out

- Zoom in or out the chart scale in the 2D/3D modes or weather display.
- Select radar range on the radar display.

For TZTBB:

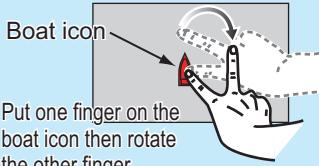

### Tap with two fingers

- Execute the function which is selected in [General] - [Function Gesture] of the main menu.

### Rotate with two fingers

- Switch between head up and north up in the 2D/3D modes.

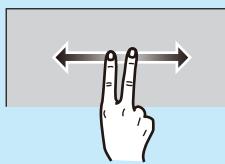

### Drag with two fingers

- Switch from 2D to 3D.

- Drag upward or downward.

Orientate 3D view.

or

## How to operate the menus

### Main menu

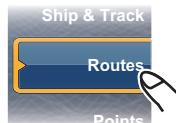

TZT9/TZT14:

**TZTBB:** Tap the Home icon.

Select an icon.

Select a menu.

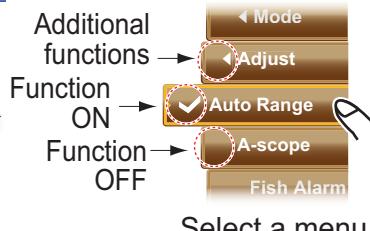

Select an item then set.

### RotoKey menu

TZT9/TZT14:

**TZTBB:** Tap the screen.

Select a menu.

- The “◀” mark indicates a multi-function soft control. Push the **RotoKey™** (or tap the menu) to go to the next level.

- The “✓” mark indicates ON status (selected). The “✓” mark disappears with OFF status (deselected). Push the **RotoKey™** (or tap the menu) to switch ON or OFF.

- There is no mark on a soft control that does the function labeled on the control. Push the **RotoKey™** (or tap the menu) to process the menu.

### Pop-up menu

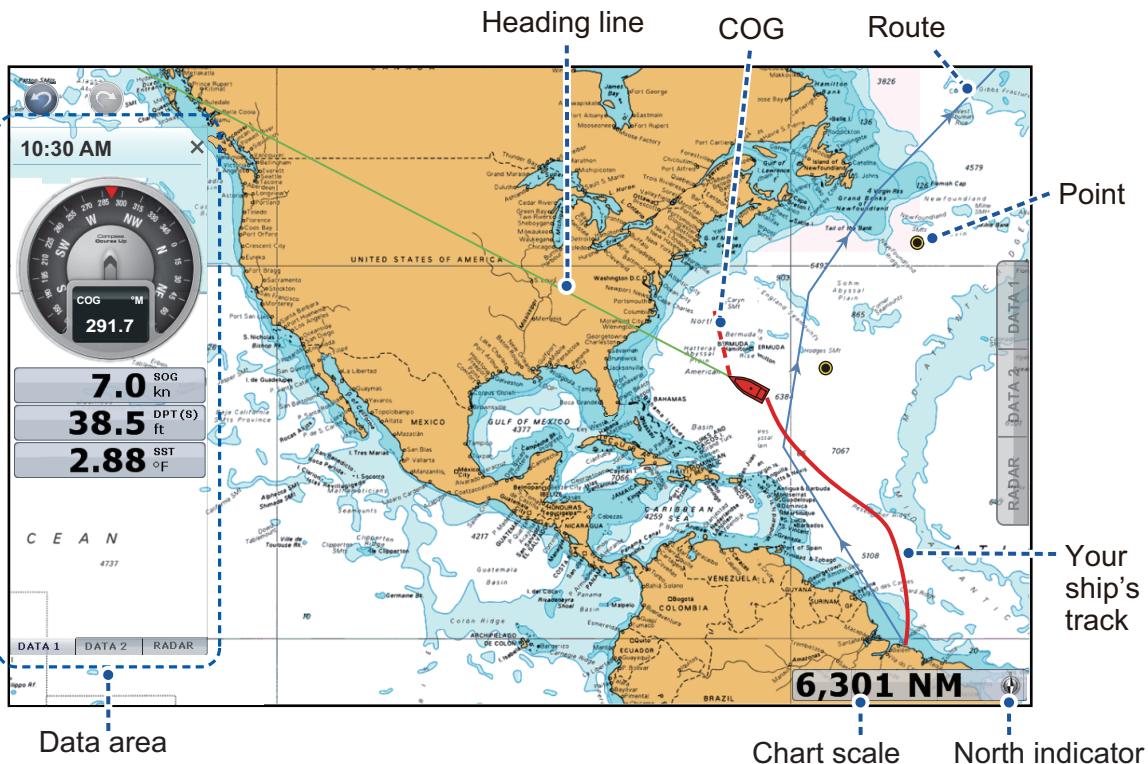

Select an object or position to display the pop-up menu.

Select a menu.

# Chart Plotter

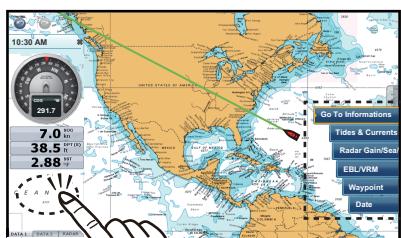

## Data area (Data box)

The data area at both sides of the screen shows the navigation data, with data boxes. You can select the data to display in the area, and show or hide the data boxes as necessary.

### How to set the data boxes

#### How to add a data box to a data area

Tap unoccupied position.

Select a menu.

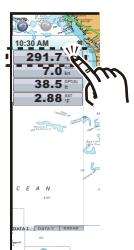

[Date] is added in the above example.

#### How to delete a data box

Drag the data box outside the data area.

#### How to switch the indication between analog and digital

Graphic : Analog

Graphic : Digital

## Points

You can put points on the chart plotter display. The position of the point, symbol and color information are saved to the points list.

### How to put a point

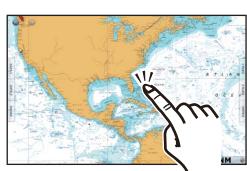

The point is put on the screen.

Select the position to set as a point.

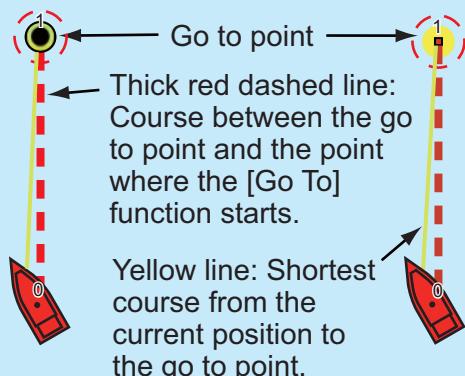

### How to go to a point

#### On the screen

Saved point

Selected position

Select the point or position to set as a point to go to.

#### From the points list

Main menu

Routes List

Points List

| Sort by : |         | Name                       | Color | Icon | Range          |
|-----------|---------|----------------------------|-------|------|----------------|
| P         |         |                            |       |      |                |
|           | POINT1  | N 43°04.617'; W 65°42.642' |       |      | Range 1.893 NM |
|           | POINT10 | N 36°43.818'; W 56°56.134' |       |      | Range 0,705 NM |

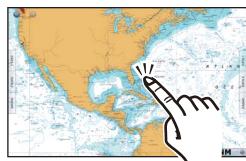

Select the point to go to.

# Routes

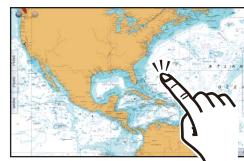

A route is a series of route points entered in the order to use for navigation. The routes are saved to the routes list.

## How to create a new route

Select the 1st route point for the route.

New Route

Select the next route point in the route. Repeat this step to enter all route points.

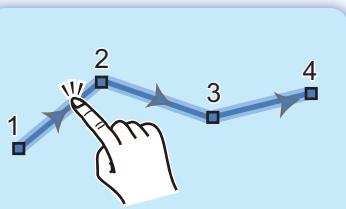

At the last route point,

End Route

## How to follow a route

### On the screen

Select a route leg of the route to follow.

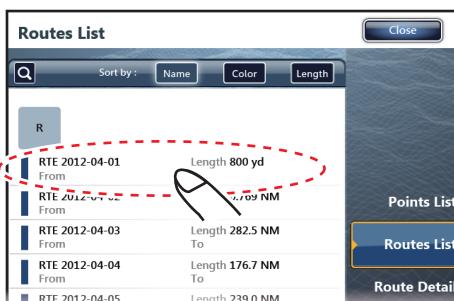

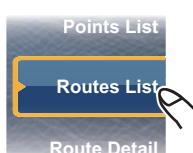

Activate

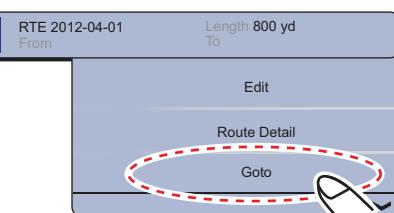

### From the routes list

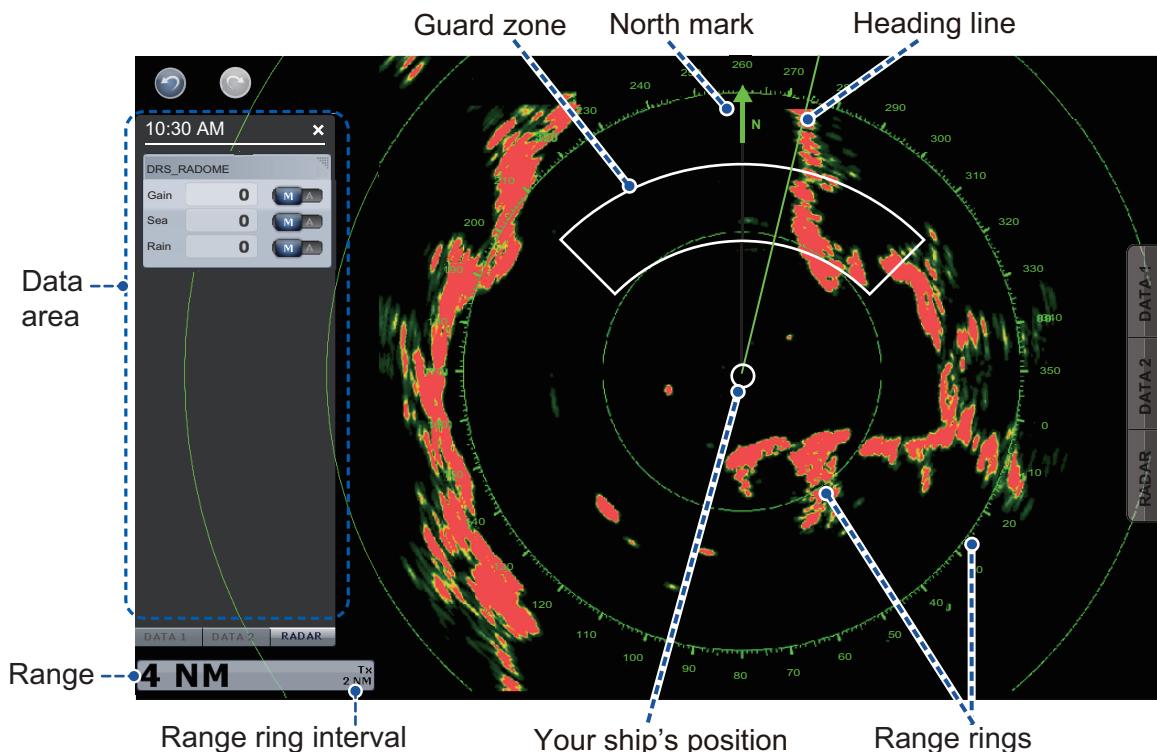

Main menu

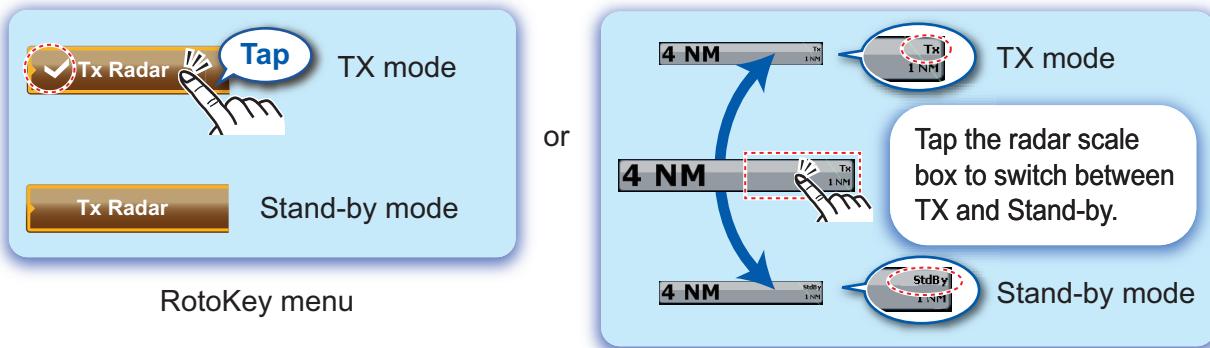

Select the route to go to.

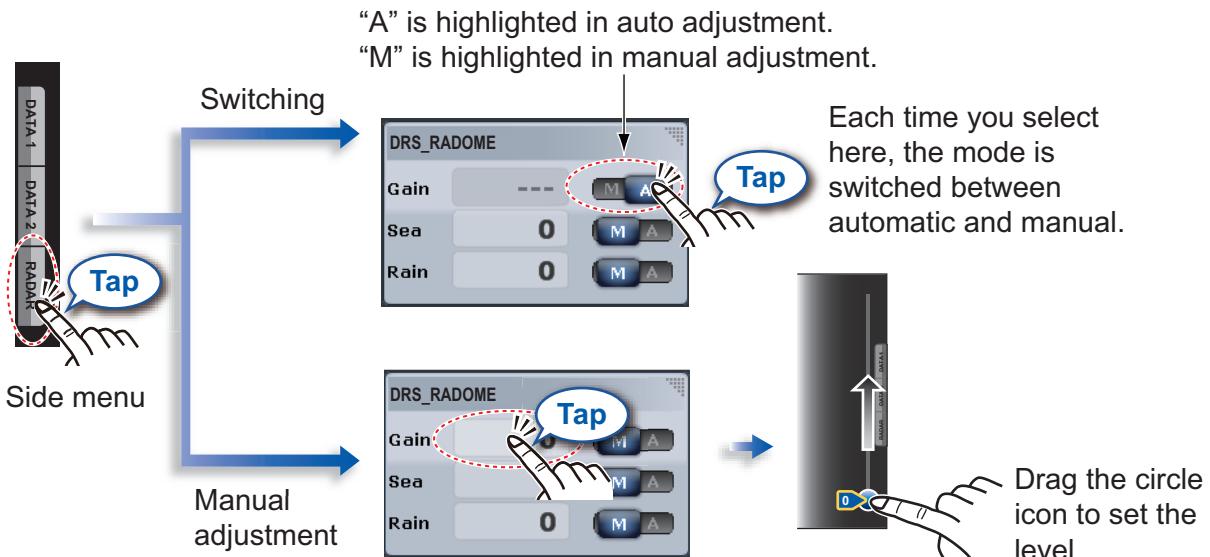

# Radar

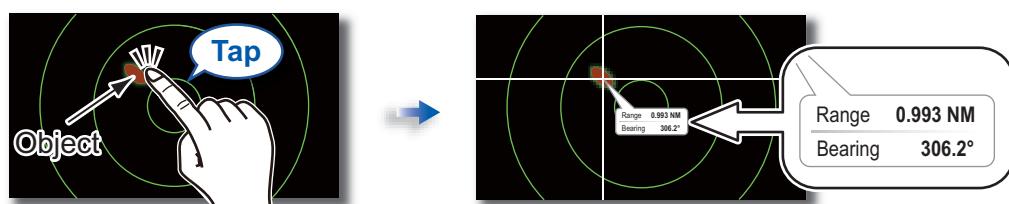

## How to toggle TX and Stand-by

## How to adjust the gain, sea and rain clutters

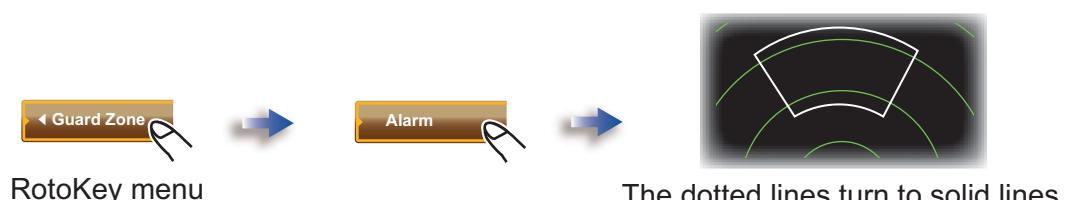

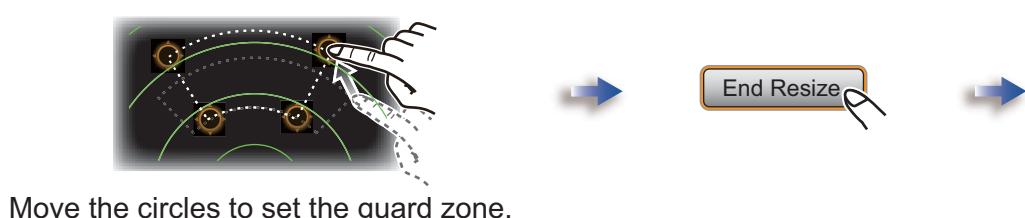

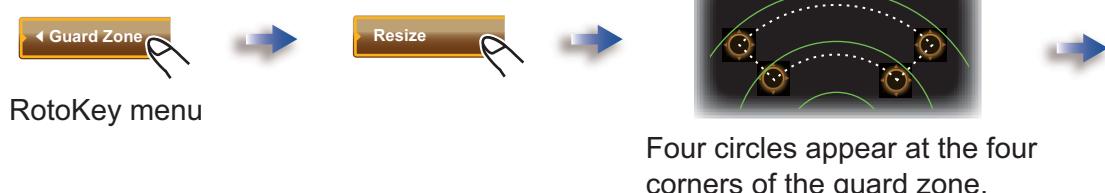

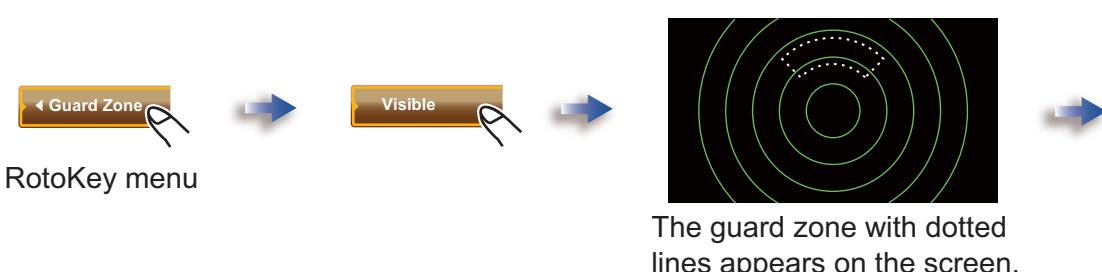

## **How to measure the range and bearing from your ship to a target**

Select an object to get the range and bearing.

## **How to set and activate the guard zone**

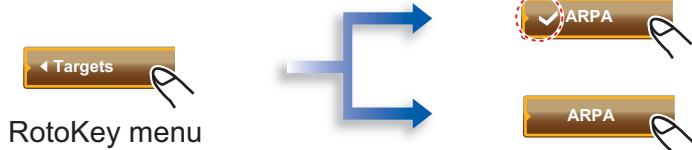

The guard zone alerts you with audio and visual warnings when a target enters the area you set.

## ARPA

The ARPA (Automatic Radar Plotting Aid) is a radar function for target tracking and collision avoidance. ARPA tracks targets and provides target's navigation information. You can track targets automatically, manually or a combination of both.

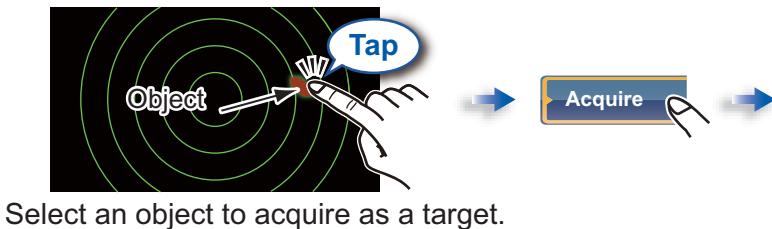

### How to show or hide the ARPA display

Show the ARPA display.

Hide the ARPA display.

### How to manually acquire a target

Select an object to acquire as a target.

### ARPA target symbols

Target being acquired

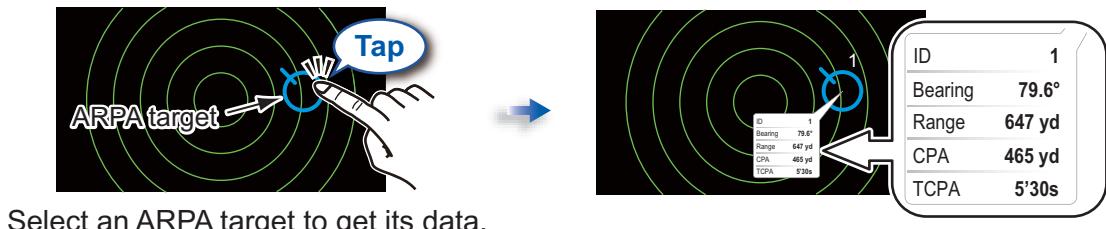

Acquired target  
(30 s after acquisition)

Lost target

### How to display the target data

Select an ARPA target to get its data.

## CPA/TCPA alarm

The CPA/TCPA alarm alerts you with the audio and visual alarms when a tracked target violates the limits selected.

CPA: Closest Point of Approach  
TCPA: Predicted Time to CPA

### How to set the CPA/TCPA alarm

Set the value then select [Confirm].

### How to acknowledge the CPA/TCPA alarm

The CPA/TCPA alarm sounds and the alarm indication appears when the CPA and TCPA of an ARPA target are within the CPA/TCPA alarm range.

# AIS (Automatic Identification System)

## How to show or hide the AIS symbols

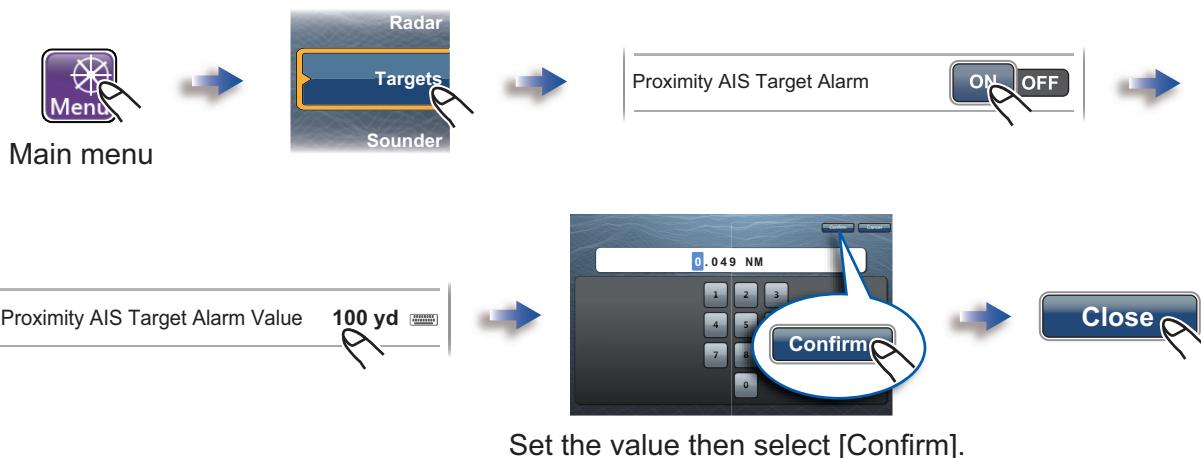

## AIS target symbols

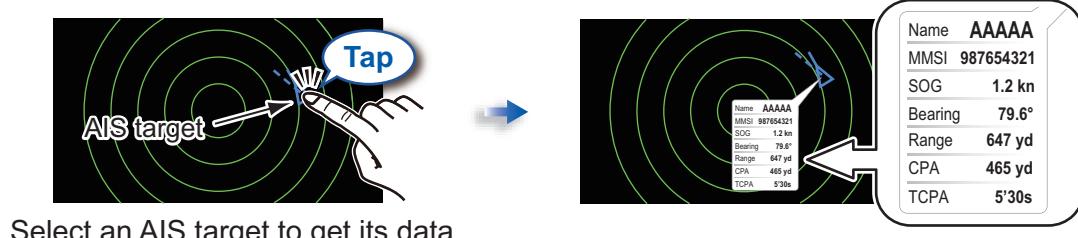

|                      | Class A AIS                                    | Class B AIS                                  |
|----------------------|--|--|
| Activated AIS target | SOG and COG vector<br>Color: Magenta           | SOG and COG vector<br>Color: Green           |
| Dangerous AIS target | Color: Red<br>Flashing                         |  |
| Lost AIS target      | Color<br>- AIS target: Magenta<br>- Cross: Red | Color<br>- AIS target: Green<br>- Cross: Red |

## Proximity AIS target alarm

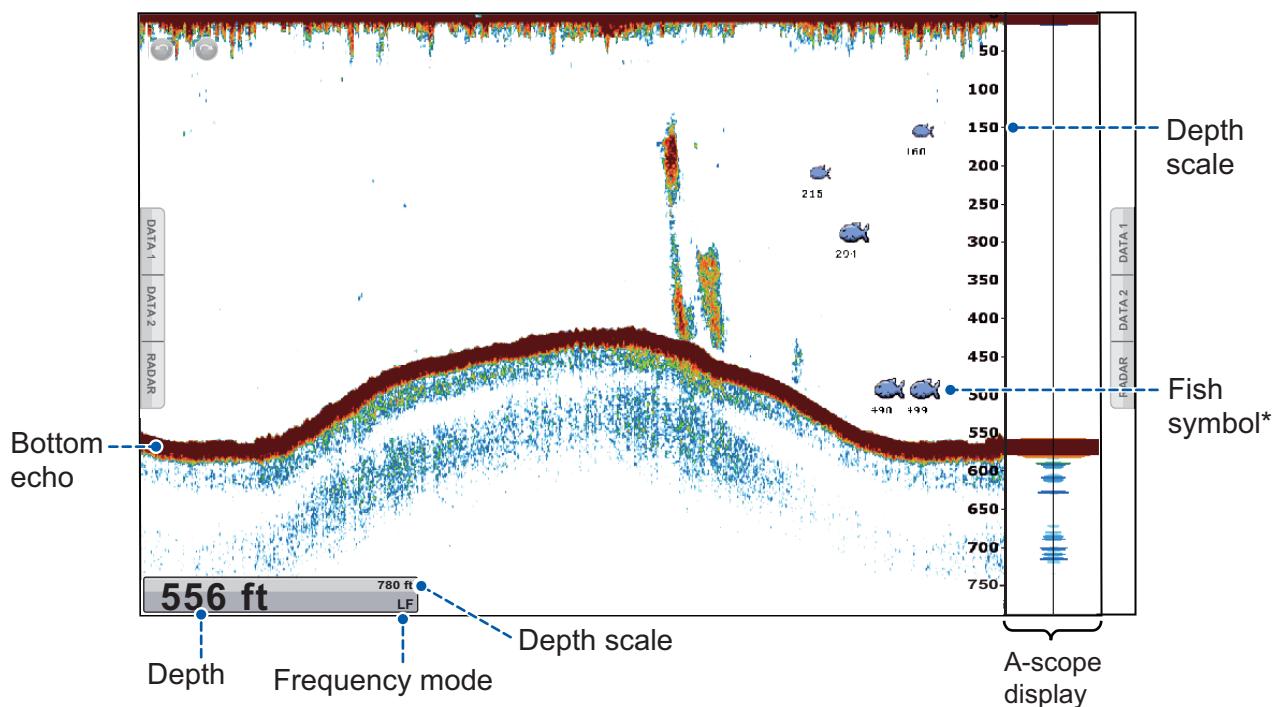

The proximity AIS target alarm alerts you with the audio and visual alarms when an AIS target is within the distance you set here.

## How to display the target data

# Fish Finder

\*: The ACCU-FISH™ feature estimates the length of each fish and shows a fish symbol and depth value or fish length. This feature requires appropriate transducer and either Sounder BBDS1, DFF1, DFF3, DFF1-UHD or FCV-1150.

## How to select the frequency

**Low frequency:** Use for general search and to find bottom conditions.

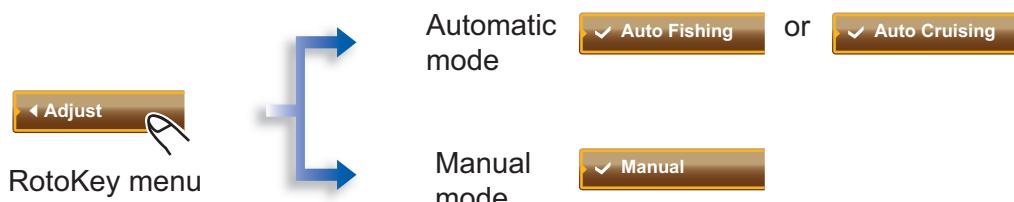

**High frequency:** Use to inspect a school of fish.

**Dual :** Both low and high frequencies. Use to compare the same picture with two different sounding frequencies.

## How to select the fish finder mode

Your fish finder can be operated automatically or manually. In automatic operation, range, gain and clutter are automatically adjusted.

### Manual operation

#### How to set the range

Clear the  mark.

RotoKey menu

**TZT9/TZT14:**

Right: Decrease the range.  
Left: Increase the range.

**TZTBB:** Pinch the screen.

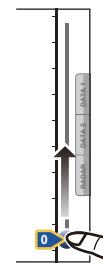

#### How to adjust the gain

RotoKey menu

**HF Gain**

**LF Gain**

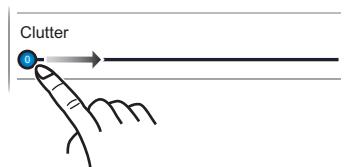

Drag the circle icon to set the gain.

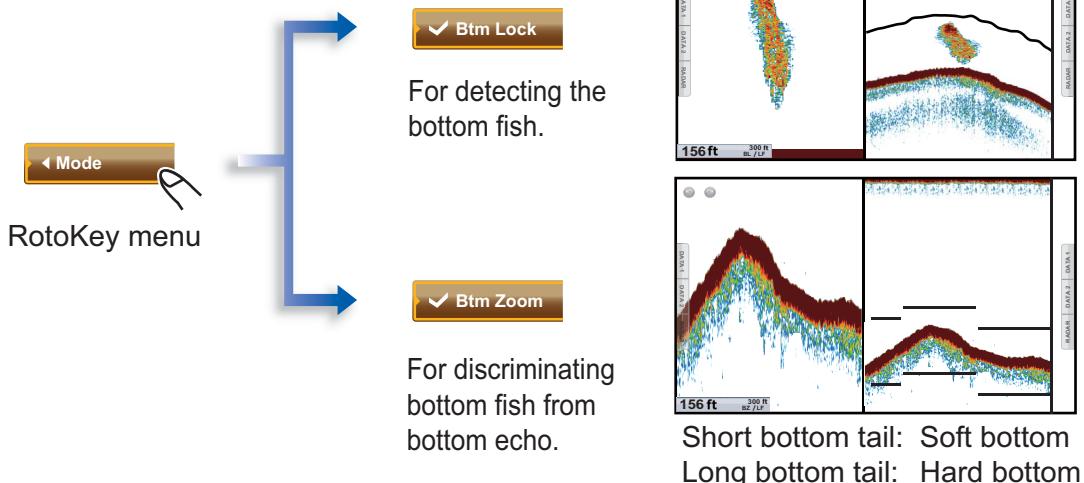

#### How to reduce the clutter

Main menu

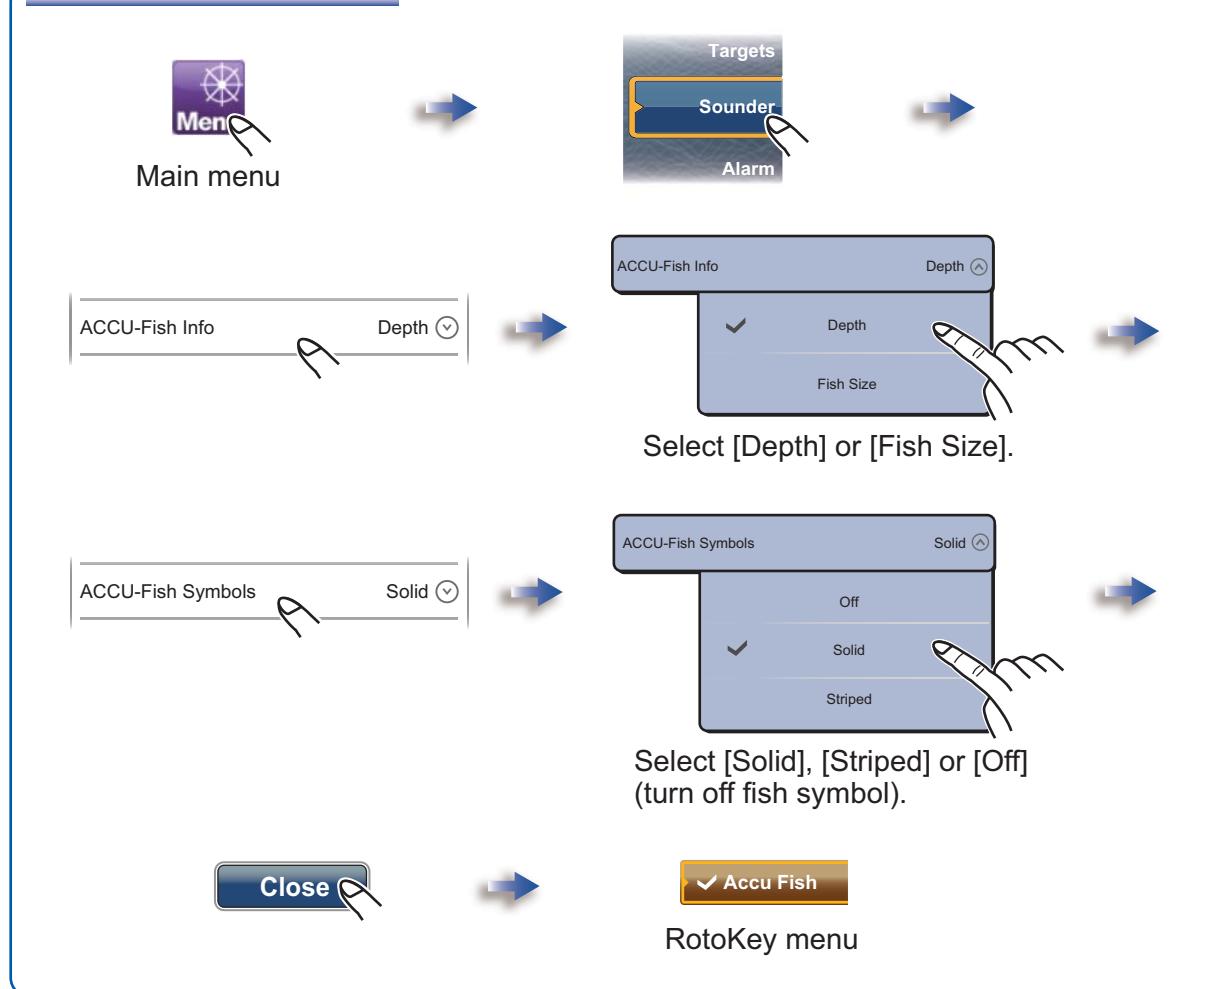

## Zoom display

## ACCU-FISH™

The ACCU-FISH™ feature estimates the length of each fish and shows a fish symbol and depth value or fish length.

### How to set ACCU-FISH™

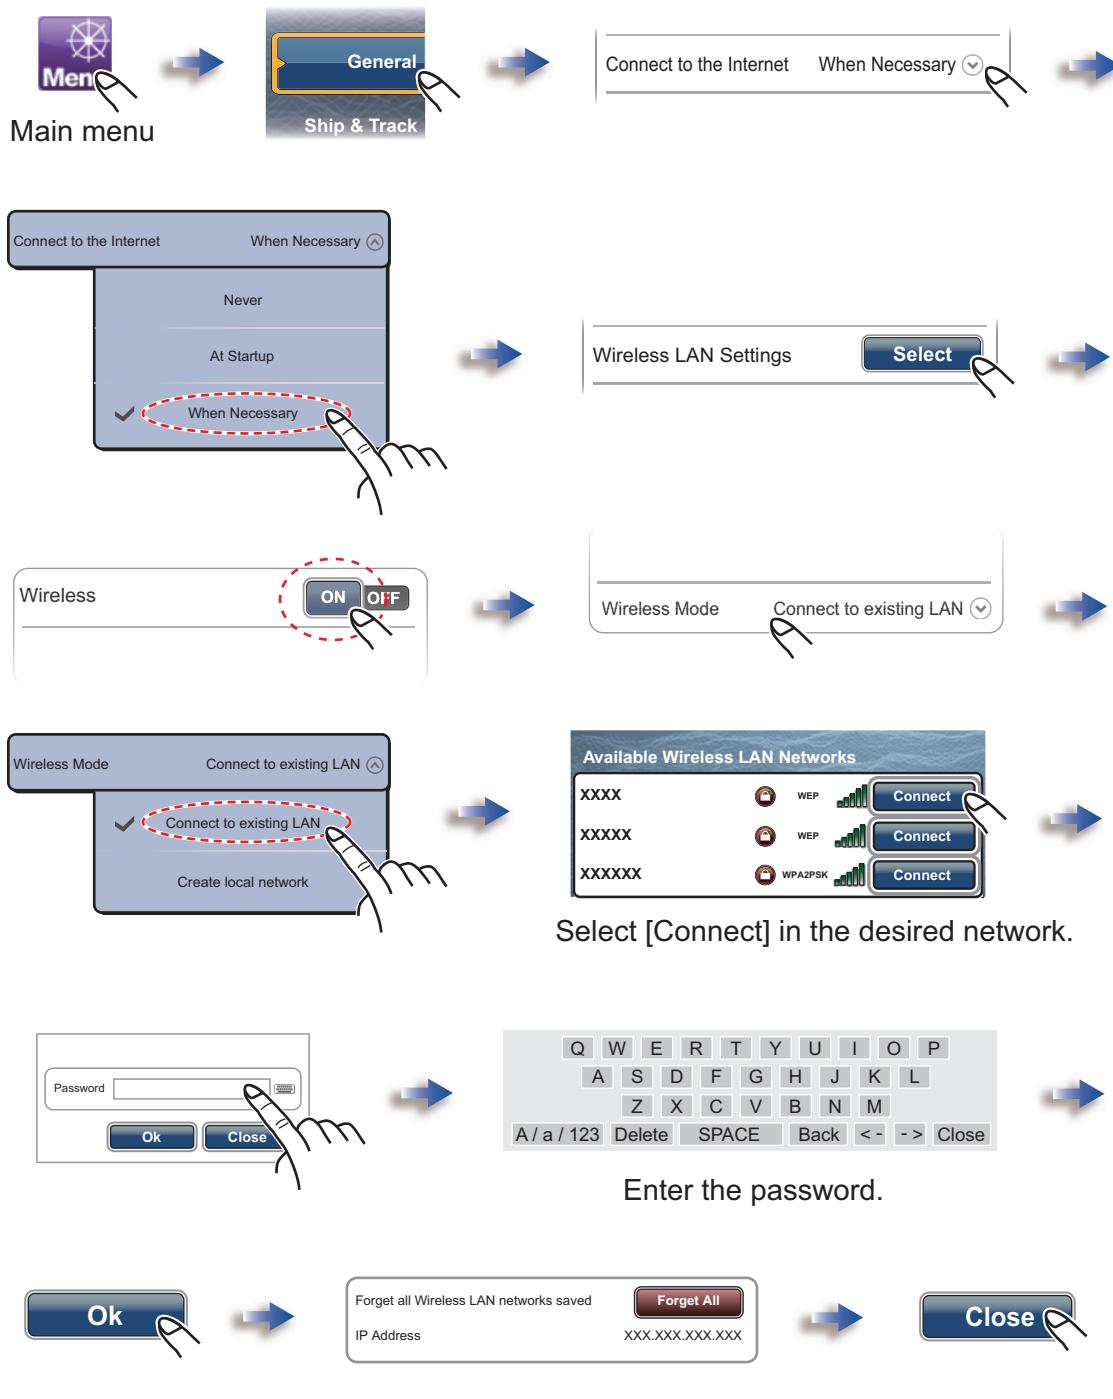

# Wireless LAN Setting

You can connect to the internet with the wireless LAN signal to download weather information and to connect to an iPhone, iPod or iPad.

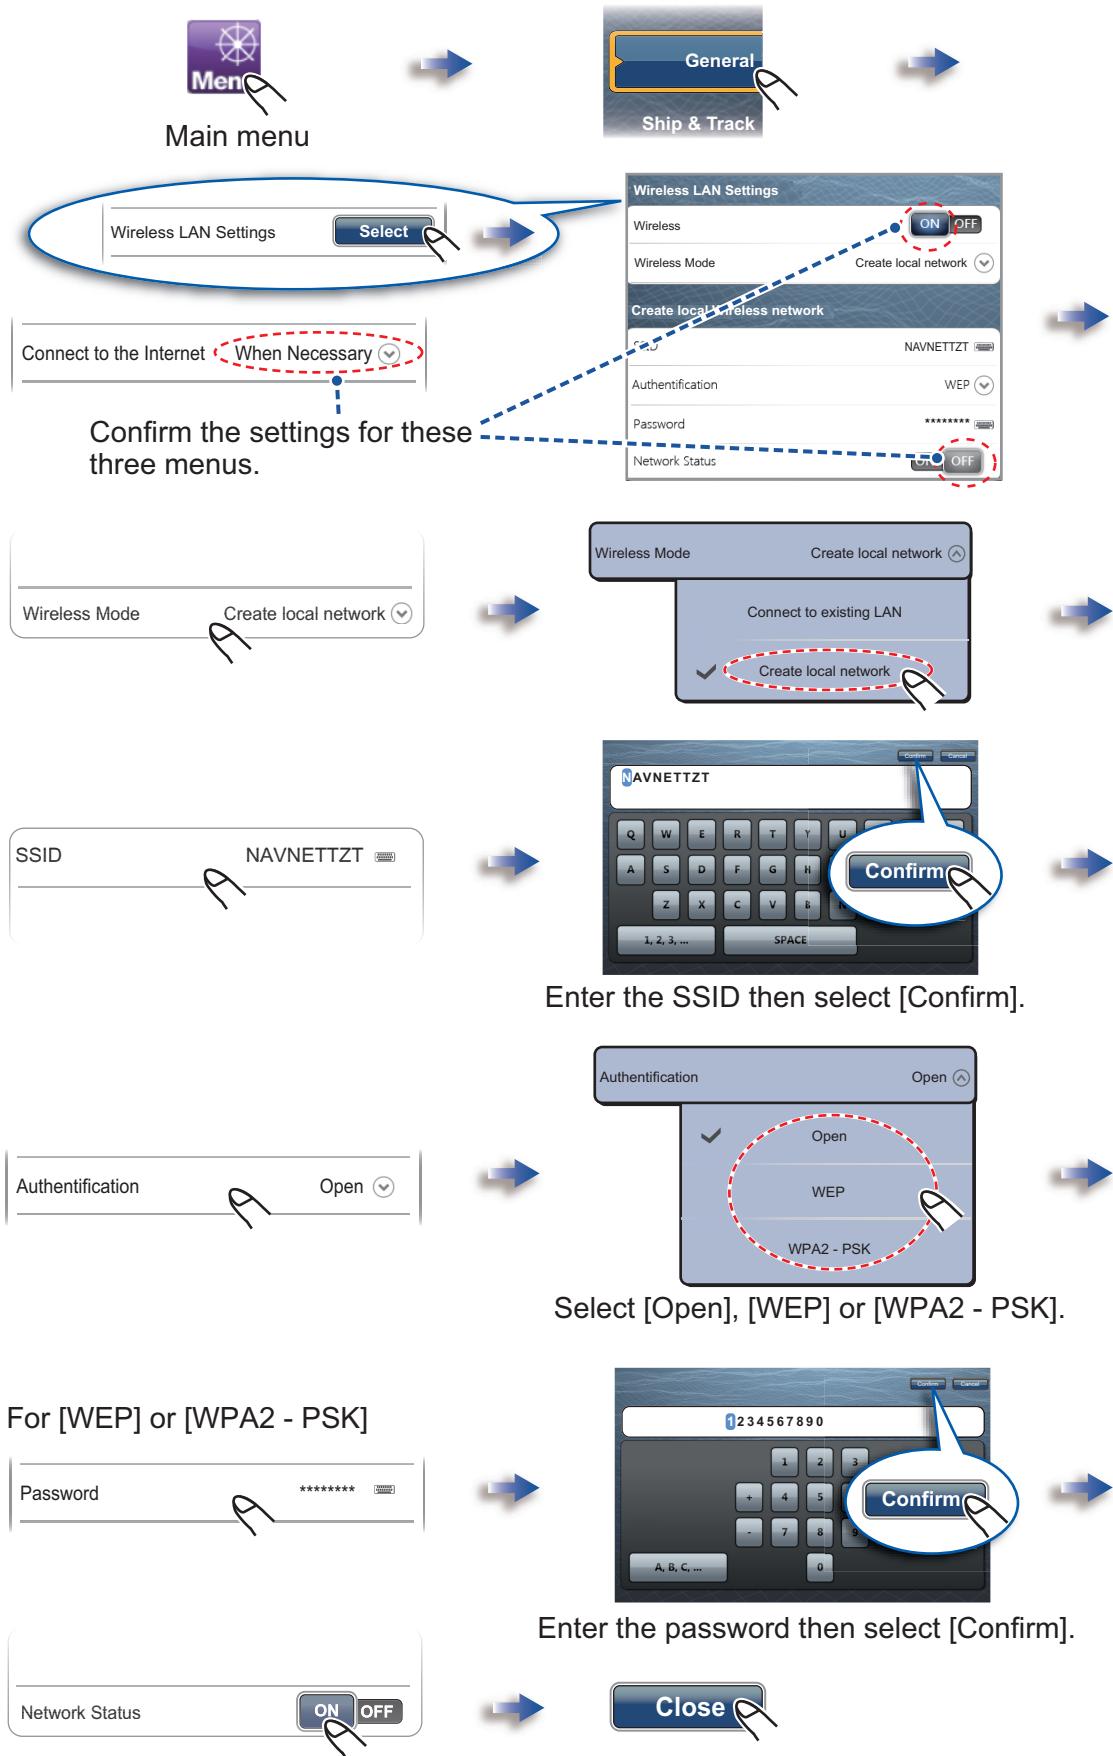

## How to connect an existing LAN network

To download weather information, connect the existing LAN network.

## How to create a local wireless network

To connect to an iPhone, iPod or iPad, create a local wireless network.
